animalMANAGEMENT

Complete Health and Traceability Management

Animal Management provides a fully integrated solution that ties together feedlot performance and individual animal data to effectively manage today`s traceability requirements while keeping the focus on the profit line.

Being a leader in traceability is a key to future opportunities. Animal Management has capabilities that no other software solution can match.

Why Animal Management?

Animal Management is flexible, integrated and powerful. This strength comes from input from a variety of creative minds and a desire to push the limits.

Animal Management has allowed some of the leading feed lots in Canada to:

✔ Qualify for new export markets and collect the associated premiums

✔ Improve health management and reduce drug costs

✔ Decrease over-weight discounts

Take Advantage of Funding opportunities when available!

Our Animal Management Software might qualify for current or future funding programs where full traceability is an eligibility requirement.
