

feedIT

Complete Feedlot Management

feedIT is designed to meet the needs of cattle feeders and background operators who are looking for tools that enhance their productivity and improve their efficiency. Easily manage daily activities while having real time reports and accurate historical data for benchmarking and informed decision making.

Why feedIT?

In today's volatile market, having up to the moment information is a primary component of success. feedIT allows you to manage activities on a lot, pen and animal basis plus the financials all in one convenient place; your database. Being real time, there is no end of day procedures before you can move to tomorrow's

transactions. feedIT can accommodate all sizes and complexities of management methods from the corporate with multiple locations all the way to single laptop operations.

Customize to fit your needs with these options that can be included at any time:

- Computer systems and Networks
- Wireless network
- Integrated scales
- Integrated EID readers

*feedIT in conjunction with AM, feedCALL and deliverIT manages every aspect of your operation
